

# PERFORMANCE FABRIC

## PRINT DESIGN COLLECTION

Shading in hospitality, education and healthcare doesn't need to be just plain!  
These flame retardant print fabrics are great in niche commercial sectors.

FR: Flame Retardant  
BO: Blockout Fabric  
MR - Moisture Resistant: Suitable for high moisture environments.

A fabric treated with Ultra-Fresh\* protects against the growth of odour causing bacteria and fungi, preserving fabric freshness.  
\*Ultra-fresh is a registered trademark of Thomson Research Associates Inc.

Fabrics treated with Louvolite Coronasafe\* help protect against coronavirus. On contact, Coronasafe eliminates 99% of coronavirus from the fabric's surface within an hour.

UV %: The % of UV light blocked by the fabric.  
SC - Shading co-efficient: The solar heat gain with the blind at the window divided by the solar heat gain with no blind at the window. The lower the shading co-efficient the higher the efficiency of the fabric.

Solar gain: The amount of heat increase resulting from solar energy entering a room. It is the total of three separate parts - the amount of energy transmitted directly into the room, the energy which is absorbed by the blind and the proportion of energy which is absorbed by the window.

CF - Colour Fastness: Fabrics are tested in accordance with BS EN ISO 105. 1: lowest, 6: highest  
DIM out: 1: low light filtering, 4: high light filtering, 5: blackout  
G Value: Amount of heat transmitted through glazing

Fabrics featuring the Greenshield mark have been tested to confirm no harmful VOC's or hazardous substances will be released to the environment in quantities that are recognised as potentially dangerous to occupants of dwellings or buildings.

T: % of heat and light transmitted through the blind.  
R: % of heat and light reflected by the blind.  
A: % of heat and light absorbed by the blind.

SG: Single glazed. DG: Double glazed. TG: Triple glazed. DG LE: Double glazed low emissivity  
G TOT: When the G-value (a measure of total solar energy that passes through the glazing system and the blind fabric) of the glazing is combined with the value of the shading.

# CREATE A BESPOKE DESIGN

With a fantastic digital printing facility on site and in-house print designers, we are able to create bespoke window blind fabric\* designs for your commercial project.

Offering a selection of performance base cloths in screen, light filtering or blackout and up to 3m wide, we can create a printed fabric that best suits your project.

Get in touch with your local blind supplier or email us to find out more.

\*Minimum order of 60m

Como Ocra

Como Alba

Como Lago

Bird Song Daybreak

Cotton Flower Ochre

Cotton Flower Blush

Cotton Flower Mineral
