T: % Transmittance
R: % Reflectance
A: % Absorption

UV Block: the % of UV light blocked by the fabric
SC: Shading Co-efficient
CF: Colour Fastness

Dim out:
1 = High light penetration
4 = Low light penetration
5 = Blockout

G Value: amount of heat transmitted through the glazing
SG: Single Glazed

DG: Double Glazed
TG: Triple Glazed
DG LE: Double Glazed Low Emissivity.

GTOT: The amount of heat transmitted through the combination of glazing and solar shading.

EX-LITE®

ROLLER AND VERTICAL BLINDS

A robust, flame retardant, blockout fabric in 10 commercial colourways. Ex-lite® is a wipeable, moisture resistant PVC that features Ultra-Fresh*.

Composition: 72% PVC and 28% glass fibre

Fabric Width: 1.83m (72")

Louvre Width: 89mm (3½") or 127mm (5")

Weight: 423g/m² (12.5oz/yd²)

SOLAR GAIN: The amount of heat increase resulting from solar energy entering a room. It is the total of three separate parts - the amount of energy transmitted directly into the room, the energy which is absorbed by the blind and the proportion of energy which is absorbed by the window.

SHADING CO-EFFICIENT: The solar heat gain with the blind at the window divided by the solar heat gain with no blind at the window. The lower the shading co-efficient, therefore, the higher the efficiency of the fabric. The test results in the table above have been achieved using a single 6mm glass glazing system.

G TOT: When the G-value (a measure of total solar energy that passes through the glazing system and the blind fabric) is combined with the value of the shading.

Fabric Composition

72% pvc 28% glass fibre

Fabric Width

1.83m (72")

Vertical Louvre Width

89mm (3½") or 127mm (5")
Other widths available on request

Fabric Weight

423g/m² (12.5oz/yd²)

Flammability Standards

Ex-lite® meets FR standard BS 5867 Part 2 Type B.
Further information is available on request.

Colour Fastness

Tested in accordance with BS EN ISO 105-B01:1999

Cleaning

Ex-lite® fabrics can be wiped clean.
See manufacturers instructions. Tested in
accordance with BS EN 26330:1994 method 7a.

Ultra-Fresh*

A fabric treated with Ultra-Fresh* protects against
the growth of odour causing bacteria and fungi,
preserving fabric freshness.

*Ultra-fresh is a registered trademark of Thomson Research
Associates, Canada.

Properties

Please note: Blockout fabric does not create a fully blackout blind, there will be lightstrike at the edge of the blind.
